NOTE: Negotiations are ongoing and exchanges between locals are on regular bases. More time is spent in preparation of National bargaining demands. The last NLMRC covered the fact that all benefits will finally involve the NPF VP.

Negotiations are still showing good results for example: some of our members are making between 18.⁰⁰ and 20.^{00 PLUS} an hour at mid contract. However we still have a majority of members under the poverty level. As well these members have barely any benefits as they are part time employees.

It is still very important that the VP partake in as many negotiation tables as possible in order to provide continuity and ensure that PSAC negotiators are informed on gains and losses from one table to another. This is required as there are always different negotiators and table members from one table to another.
